EARTH DAY 2022

With the upcoming celebration of Earth, we would like to take a moment to discuss the importance of the decisions that humans have regarding our environment.

"**2,400** trees are cut down **each minute**. By the time you finish reading this sentence, another **three hectares** of forest have been cut down." While deforestation rates have declined since 2010, trees are still being harvested at an alarming rate.

By selecting an alternative, like HempWood, you can be part of the solution. HempWood can be produced 100 times quicker than traditional hardwoods and removes carbon dioxide from the atmosphere.

This Earth Day be part of the solution by choosing HempWood. #IchooseHempWood
