

### **FAMILY HANDYMAN**

Don't miss the July/August issue of Family Handyman!

HempWood® was recently featured in Family Handyman's homeLAB, which serves as a testing zone for innovations.

Author Glenn Hansen highlights some of the capabilities of HempWood Lumber and Flooring. The homeLAB Team even put some HempWood samples to the test. And, here is what they have to say.

"Woodworkers just need to predrill and use sharp saw blades. The wood responded well to sanding," Hansen said.
